## Thunderstorms

It is dangerous to be outside during a thunderstorm. In a thunderstorm, there are many different types of weather. Some of these are rain, wind, hail, thunder, and lightning. Lightning is the electricity that appears to be a long white or yellow rod that touches the earth. Thunder is the noise that rumbles or cracks during a thunderstorm. Thunderstorms happen most often in the spring because the weather is changing.

List five types of weather you may see during a thunderstorm.
