Date: _____, _____

Spring Time Rain

During the spring, the weather changes from freezing cold to warm. Throughout the season, it rains a lot. This rain is caused because the temperature is changing. While many people do not like when it rains a lot, the rain is necessary for plants and flowers to bloom. Often times, this rain turns into bigger storms, like thunderstorms or tornadoes. After the wet spring season, comes warm summer.

Why does it rain so much during the spring?

What is the good thing about spring rain?
