Dear Parent/Guardian,

Gosnell School District has been approved for 5 AMI (Alternate Methods of Instruction) days for the 2018-19 school year. These days will be used to avoid adding makeup days during holidays and at the end of the school year.

Gosnell School District has already used one of the allotted AMI days when we received flooding and power outages from extreme inclement weather on August 17th. With winter weather approaching, there is a potential for more days to be missed due to weather conditions. In preparation for those days, teachers have created assignments for AMI days 2-5 that will be sent home as packets with all students. These packets will be sent home on November 6, 2018, so that students will be prepared to do the work if/when inclement weather occurs. Please store these packets in a safe place so they will be ready for use should the need arise.

Students will have 5 school days following an AMI day to complete required work. Students will be considered “present” for an AMI day when all assigned work is completed successfully.

If you have any questions, you can contact the high school or junior high.
